Plan

Hi Raul,

It was really great to meet you and your parents. You are very insightful and invested in your health which is great to see. I appreciate your candor in sharing your experiences which helps us understand what you have been through and how better to help you. Our goal will be to find root causes for your main complaints and work with lifestyle interventions to address any healing opportunities. During the session, we uncovered some root causes.

As a quick summary, you have:

- An MSQ of 27 indicating a mild amount of toxicity
- Decreased digestive capacity as evidenced by a failed burp test which means stomach acid is low.
 - This will also affect protein breakdown, iron absorption, B vitamin levels, and ultimately energy
- A candida score of 116 which, for men, indicates the likely presence of candida
- High life stress score of 520, so mitigating stress will be important
- Vitamin D is LOW at 24.6 which can affect mood, immune function, bones, and energy. Target: 60-80.
- Homocysteine is elevated (involved in methylation and utilization of B12 and folate)
- B12 was insufficient at 373. Target: 1000. We are starting vitamins to improve this number.
- Lithium can affect Creatinine and BUN - please track this for kidney function; you will want stability in these levels. Track progression despite being in normal range.
- Neurotoxins can affect mental health, so testing for this will be valuable to identify any root causes or contributing factors esp. with history of environmental disaster and need for generators

These will be the focus of treatment over the next two months.

Medications:

- Do not take any NSAIDS with Lithium and other items. Here is a link to look at all the items that will interact:
 - https://www.medsafe.govt.nz/profs/PUArticles/September2017/Lithium.htm?utm_source=chatgpt.com
- ALWAYS ask about drug to drug interactions or drug to OTC/supplement interaction. Have family members review as well.
- You may want to consider maximizing the Lithium to assess benefits which may enable you to come off of the other medications you take for sleep and mood support. The lithium should remit sleep problem and low grade depression by itself. Consider discussion of an increase by 150 mg to total dose of 1350 mg/d and repeat lithium level in one week in am prior to taking morning dose. Do not let the lithium level go beyond 1.0. There is room for improvement in the dose and potentially discontinuing two medications. You may not need the other two at all.
- Also be aware of **Stephen Johnson syndrome** from the lamictal. It is a rare side effect but important to know of the possibility as it can be life threatening. Once you reach 100 mg/d, and if for some reason you stop it for a week or more. It must be started at 25mg/d again and titrated up to avoid this side effect. Report this to your provider immediately. <https://www.nhs.uk/medicines/lamotrigine/side-effects-of-lamotrigine/>

This is your optimal health plan and D.R.E.S.S.® Protocol. DRESS stands for diet, rest, exercise, stress, and supplements. Any hyperlinks will need to be copied and pasted.

Things to do this week:

- Purchase a keto meter - we like the KETO MOJO that tracks both glucose and ketones and is more accurate than urine strips. Watch the videos on how to use it.
 - <https://keto-mojo.com/>
- Purchase the book (also on audio): Change Your Diet, Change Your Mind Dr Georgia Ede
 - This is a great reference for the Ketogenic Diet and has recipes and instructions for the KetoMojo

- Stop any probiotics 7 days ahead of completing the GI Map
- Stop all supplements 2 days prior to getting blood draw and completing the OAT
- Get the stool and urine testing out at the beginning of the week. See instructions below
- Arrange for blood draw through Vibrant America with Carol - DONE!
- Please upload your most recent Lithium level and other labs not already sent
- Make another appointment with Nancy, your health coach.
- Read through information provided in RESOURCES section

This is a journey. I am giving you things in steps so you don't get overwhelmed. We talked about many things from a bird's eye view. So now these are the steps that I want you to concentrate on for the next 6-8 weeks.

Get a journal to write down SPECIFICALLY the changes in supplements and food or routine - increase, decrease, start, stop of supplements or change in quality, frequency, amount of stool or sleep, new symptoms, etc.

Print this out and highlight areas. Keep a typed updated list of supplements with you so that you can update every pre-appointment form that you will receive via email 10 days prior to each appointment.

This first plan is quite comprehensive. Because that can be overwhelming, it is meant to be a reference for you. After each session you will receive a new plan that builds upon the last. We never expect that you tackle it all at once. Nancy will help you implement all areas of the plan and I am here to support you as well. Please feel free to reach out on the portal anytime you need support.

DIET:

An assessment of your 3-Day Food Diary shows that you eat a very clean diet that is mainly whole food based and similar to a Paleo Diet.

For depression and psychosis, we will recommend a KETO MEAL PLAN, at least for a short time. I know this is what you were striving for, but in order to reach ketosis, you would need a higher percentage of fat than you are currently eating and be using a meter to measure your ketones and glucose (blood sugar).

This may be difficult to follow when in school so we can transition to a different plan at the end of the summer. In the meantime, you can enjoy the brain boosting benefits from this method of eating while you are home.

Initial Dietary Recommendations:

- Please follow a Keto Meal Plan that is gluten and dairy free
 - Macro percentages for a keto diet can range person-to-person but are approximately:
 - Fat: 70-80% | Protein 15-20% | Carbs 5-10%
- You will find your "sweet spot" if you use the meter and assess how you feel
- It can take 1-2 weeks to fully get into ketosis
- Use the guidelines in the book CHANGE YOUR DIET, CHANGE YOUR MIND by Georgia Ede MD which is the healthiest form of keto
 - This also includes recipes and instructions for use of the KetoMojo meter
- A guide for KETO will be uploaded to IntakeQ for more information. If you need further assistance you can work with April separately via ZOOM to support you. Coaching sessions are \$150 per hour.
- If you use salt on food, choose Celtic salt or high quality, mineral-rich salts like:
 - Redmond Salt or Baja Gold Salt
- Implement strategies from the digestion video that you watched

Hydration

- Aim for half your weight in ounces, but have your hydration be consistent daily so that your body can acclimate and Lithium levels are not affected since they are processed via the kidneys.
- We DO NOT recommend electrolytes while you are on Lithium

REST:

- Restorative sleep is important.
- I know you would like to sleep without the use of a medication which we can work towards

EXERCISE:

- Continue walking and strength training

- Movement is vital for mental health and moving lymph

STRESS REDUCTION:

Because your life stress level is high it will be important for you to train your body to revert back to PARASYMPATHETIC MODE (rest and digest) instead of staying in fight-flight.

The quickest way to do this is to practice breathwork throughout the day in micro-sessions or at least 10 minutes a day.

- You can continue to use Healthy Minds App (or another app), but work with Nancy to develop a custom routine for you

Nancy is trained in somatic interventions for trauma release as well as the psychology of eating.

- She will be instrumental in helping you develop a stress reduction practice that fits your needs.
- She can also help identify the best strategies for you since you feel meditation can make you feel a higher level of stress in the body

SUPPLEMENTS:

Always sequence and titrate new supplements:

- Sequence - start each supplement one at a time for at least 2 days
- Titrate - some supplements will need to be increased gradually.

How to do this:

- Add them all in one at a time at the lowest dose and then go back to the beginning and increase dosing as tolerated until you reach targeted dosing recommendation

Start in this order after testing completed:

- **Ortho Digestzymes** - take 1 capsule at the start of each meal to enhance digestion
- **Metagenics PhytoMulti** - take 2 capsules daily with food
 - This is a highly bioavailable multi to help fill the wells of nutrient deficiencies
- **Vital Nutrients B6 + B Complex** - take 1 capsule daily with food - to improve your homocysteine

Continue: your supplements

- Vitamin D3+ K2 - take as you have been and we will reassess when the most recent blood lab results are back.
- I have added to Fullscript - **Seeking Health Vitamin D3 K2** 5000 - take 1 capsule daily with food

RESOURCES:

Dr Georgia Ede Website:

- <https://www.diagnosisdiet.com/>

Keto Guide from Metagenics will be uploaded to IntakeQ as an additional resource, but please know you:

- Want to follow a dairy free version
- Can use recipes from Dr Ede's book or other resources

Watch videos on You Tube on channel - **Metabolic Mind**

TESTING/FUNCTIONAL LABS

Please do these tests/send out Monday - Wednesday

Test Cost Summary: Cash

X **GI MAP** \$389 Diagnostic Solutions - stool test

X Mosaic Diagnostics (urine sample):

- EnviroTOX Complete + Heavy Metals \$854 - this includes the OAT, Mycotoxin test Environment toxin test and Heavy Metals
- NOTE: discounts are offered for multiple tests from this company

X **Functional Blood Work - Vibrant America** - + MTHFR. Carol will confirm your specific price

BLOODWORK - VIBRANT AMERICA

I can order your labs through Vibrant America as insurance typically does not pay for comprehensive blood work without having specific disease states. If you prefer to go through your insurance, please let me know and I will send you a lab slip, however, I cannot guarantee that all testing will be covered.

Our basic lab panel consists of the following labs: CBC with differential, comprehensive metabolic panel, lipid panel, anemia panel, FULL thyroid panel, folate, B12, Vitamin A & D, DHEA-sulfate, Hemoglobin A1C, insulin, GGT, HS-CRP, ESR, homocysteine, zinc, copper, selenium, magnesium RBC, and omega 3:6 panel. (substitutions can be made If you've had some of these labs done recently)

Basic Panel \$256.93 + MTHFR and B vitamins

Carol will confirm the cost with you before placing the order and will let you know the fee for the mobile phlebotomist to come to your home. Once the order is placed, payment must be made in full to Vibrant America before they will send you the test kit.

When it comes time to do the labs, STOP at least a couple days before the bloodwork: all enzymes, vitamins and minerals, and probiotics, if you are taking them.

YOU WILL NEED TO FAST 12 HOURS and CEASE any vitamins and mineral supplements for 1 day

GI-MAP:

The GI-MAP stool test utilizes cutting edge, Quantitative PCR technology to provide a true DNA/PCR based stool test. This technology has high sensitivity, specificity and a rapid turnaround. The GI pathogens include bacteria, parasites and viruses. Continuing with this platform, the GI-MAP measures opportunistic organisms, normal flora, fungi, parasites and antibiotic resistance genes. And the Plus refers to immunologic markers for GI health and function including SIgA, Elastase, Calprotectin and Anti-gliadin testing. Send your insurance information with a check or credit card for \$189. They will bill your insurance. Without insurance it is \$389. Collect stool and send it to lab using the Fedex envelope enclosed in the kit.

- Sample Report: https://www.diagnosticsolutionslab.com/sites/default/files/GI-MAP-Sample-Report_ARs.pdf
- Video instructions: GI Map Stool Test Instructions: <https://www.youtube.com/watch?v=lqBdlSNn5Xg>
- <https://www.diagnosticsolutionslab.com/sites/default/files/Stool-Collection-Instructions.pdf>

MOSAIC DIAGNOSTICS ENVIROTOX COMPLETE + METALS \$854

- Insurance does not pay for this

Instructions

- <https://live-mosaic-gpl.pantheonsite.io/resource/urine-collection-kit-instructions/>
- Put the ice pack in the freezer upon kit delivery
- Please follow the instructions within the insert of what foods to avoid for 48 hours before the test.
- You will collect the first morning urine and send it via FedEx. If you urinate multiple times a night, please discuss this with us. It may require you save all urine and take a sample from this collection

Foods to avoid 6 days prior to testing (there may be more on the insert with the kit):

- Cheese and sour milk products, Buttermilk, Sour cream
- Nuts, Peanuts, Cashews, Pecans, Walnuts, Brazil nuts
- Dried fruit, Raisins, Apricots, Prune, Figs, Dates
- Grains, Wheat, rice, oats
- Packaged and smoked meats, Sausages, Hot dogs, Corned beef, Pastrami, Smoked fish, Ham, Bacon
- Edible fungi, Mushrooms, Truffles

SUPPLEMENT INFO:

Several companies are used for supplement recommendations:

- Fullscript

- CellCore
- When starting any new supplements, please start one supplement at a time every couple days so that you know that you are tolerating it before starting a second or third one.
- When ordering any supplement, review the label to make sure it does not have ingredients that you do not tolerate.
- Please keep an accurate list of all of your supplements on a word document and that way you can paste it onto the pre-appointment form prior to the appt. which you will receive from Intake Q.

FULLSCRIPT:

- Below are products that I have recommended for you.
- They are listed here for your convenience.
- We will attach treatment plans and other documents after each visit so that everything is conveniently in one place for you and because it is a HIPAA compliant platform.
- Feel free to compare to other websites but please make sure you are using a reputable website. Amazon sites sometimes sell fraudulent copies of these pharmaceutical grade products.
- Some of the better websites are iherb.com, pureformulas.com, nutrition express, the natural, Swanson health products and vitamin wagon.
- You certainly don't have to buy from this website but we do get a percentage, if you become a member. Shipping 4-7 days is free if you purchase a minimum of \$50.

OUR HEALTH COACH - Nancy

- Working with a health coach between visits with me increases success
- Nancy can help you organize and interpret the plan, get habits into place, and be an additional resource to educate you in the areas of:
 - Nutrition and the psychology of eating
 - Stress reduction - specific interventions and trauma release
 - You get 6 sessions included with the Intake fee.
 - You may purchase a package of 3 to continue with her if you wish.

COMMUNICATION:

- Please use the portal on IntakeQ to communicate with me as it is HIPAA compliant and keeps all of our communications in one place as an auxiliary record.
- If you don't receive a response within 24 business hours, please message me again or call me at 401-270-4541.
- On rare occasions, I sometimes do not get a notice. Bookmark this link so you know where to go to get to the portal - <https://FunctionalMind.intakeq.com>
- Through IntakeQ, you can access Dr. Stein, the FDN-P's on staff (April or Jenn), and our health coach Nancy

FOLLOW UP appointment: July 3, 2025 at 10:00 am ET in the OFFICE for 90 minutes

The follow-up appointment will be a ZOOM call and the link will be sent to you via email with the pre-appt form.

You will receive a pre-appt form to complete 10 days before the appt. Please complete 48 hours or earlier than the appt to give time to get it uploaded into the computer. We don't want to take time during the appt to do this for my review

Let me know if you have any questions.

Achina Stein DO IFMCP
